**WHEREAS**, Alcohol Awareness Month provides an opportunity to increase outreach and education regarding the dangers of alcohol use disorder (AUD) and issues related to excessive alcohol consumption; and  
**WHEREAS**, adverse childhood experiences increase the likelihood for youth to engage in high-risk behaviors such as alcohol misuse, and such youth are at an increased risk of developing AUD; and  
**WHEREAS**, in 2022, 19 percent of adults in Arizona reported binge drinking and more than 140,000 deaths annually attributed to excessive alcohol use in the United States; and  
**WHEREAS**, alcohol is the most commonly used substance among youth in the United States impacting individuals, families, and communities; and  
**WHEREAS**, results from the 2022 Arizona Youth Survey show the most frequently reported substance used across 8th, 10th, and 12th-grade youth is alcohol; and  
**WHEREAS**, research indicates that alcohol use during the teenage years could interfere with normal adolescent brain development and increase the risk of developing AUD; and  
**WHEREAS**, youth who drink alcohol are more likely to experience changes in brain development that may have lifelong effects, including physical and sexual violence, school and social problems, increased risk of suicide and homicide, and alcohol-related vehicle crashes; and  
**WHEREAS**, ten percent of youth in Arizona across 8th, 10th, and 12th grade reported riding in a car in which the driver had been drinking; and
